

Actual-size template guide

Single-source V2 geometry | print only at Actual Size / 100%

Print a representative template page first. Measure both sides of its 1-inch square with a physical ruler. The 6-inch window must also measure 6 inches. Stop if either dimension is wrong; turn off Fit/Shrink and check printer scaling. Digital dimensions do not prove your printer output.

Every template sheet is US Letter, 8 1/2 x 11 inches. The 6-inch drawing frame and the 1-inch calibration square are separated. All marks are at least 1/2 inch inside the sheet; typical home printing is accommodated, but the specific printer is untested.

FRONT maps show the finished right-side placement. MIRRORED sheets are reflected horizontally for tracing onto the paper side of fusible web. Fuse that web to the fabric wrong side; after peeling and turning right-side up, the shape matches the FRONT map. Do not mirror again in printer settings.

For isolated pieces spanning multiple sheets, assemble ONLY the tiles bearing that same ID. R1 is always the top row in this rebuilt booklet; this supersedes the old bottom-up numbering. A single-piece tile has its own local origin and cannot be inserted into the full placement map.

Trace the complete closed outline of each isolated piece, including portions later covered by other layers. Rough-cut the fusible outside the line, fuse to fabric, then cut exactly on the line. No seam allowance is added to raw-edge applique.

The full FRONT map includes all five embroidery paths. Transfer those marks to the fabric right side. Dashed marks are stitching guides, never cutting lines. Use a washable fabric marker and test its removal first.

The four Star TL/TR/BL/BR FRONT maps include background seams. Corner squares finish at 2 inches; cut 2 1/2 inches. Ivory rectangles cut 2 1/2 x 8 1/2; centers cut 8 1/2 square. All background cut sizes include 1/4-inch seams.

Star IDs begin ST, snowflake is SN01, medallion scarf begins S, and fringe begins F. These prefixes prevent confusion with the old template numbering. The medallion inventory is exactly 28 pieces; E01-E05 are embroidery only.

Medallion cutting index

Each listed ID is one fabric piece; dimensions are outline bounds, not rectangles to cut

SVG piece ID	Outline W x H (in)	Qty
A01-left-twigg	4.988 x 5.010	1

Full checker cutting gauge

CUT size including 1/4 inch on every edge | Actual Size / 100%

1 inch x 1 inch

CUT 2.9 x 2.9 inches

Finished: 2.4 x 2.4 inches (dashed)

The long rule measures exactly 6 inches. Check it and both sides of the separate 1-inch square physically before using this gauge. Solid rectangle = cutting edge; dashed rectangle = finished patch boundary. No additional seam allowance.

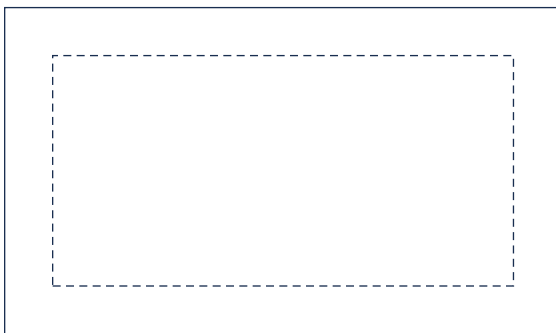

Use this checked outline to set an acrylic ruler or make a stable plastic gauge. Keep the half-height rectangle 2.9 inches wide and 1.7 inches tall in the chart. Do not substitute nearby fractions.
